RxASP 600™

Fully Automated, Robotic Strip Packaging, Scalable for any Size Pharmacy or Volume

Experience the unparalled, adherence packaging automation technology of the RxASP 600™. No more trays or remote filling stations. No more down time to load trays or cassettes. Plus, no more errors from hand filling trays–the RxASP 600 can hold up to 600 "smart" RFID canisters*, while our universal "smart" canister dispenses virtually all non-loaded oral solid medications such as gel caps, half tabs, etc. Optional integrated machine vision inspection means higher accuracy and significantly lower operating cost.

Restocking occurs while the machine is fully functioning, so there's no down time. Even cleaning is far less time consuming. More things get done in less time, greatly enhancing pharmacy efficiency.

The RxASP family of machines has the lowest daily operating costs in the industry–we use automatic, variable pouch length and our consumable pouch material costs are notably the least expensive. Thermal printing means no ink ribbons.

** More RFID canisters can be stored nearby to be swapped in and out. RxSafe does not recommend the purchase of "spare" packaging units—further space and cost savings.*

Accuracy & Speed | **Space Savings** | **Narcotics Security** | **Inventory Management**

- Most advanced feaures industrywide, made in the USA
- Unmatched flexibility and security
- Accommodates up to 600 "smart" RFID canisters at a time
- Universal RFID canister—for ***all*** non-loaded oral solid medications (including gel caps, half tabs, etc.)
- No more trays
- No more remote filling stations
- Optional integrated machine vision for pouch inspection–single workflow step, no secondary machine
- Up to 200 single or multi-dose pouches/min.
- No more expensive consumables
- Less labor
- Smallest footprint
- Less on hand inventory required
- Intelligent software features without extravagant pricing
- Positive displacement pouch filling

Specifications for RxASP 600™ System

• Dimensions	W=52" L=102" H=95"
• Weight	700 lbs. per RxASP 600™ tower
• Capacity	Up to 600 RFID "smart" canisters simultaneously
• Script Fill Rate	Up to 200 multi-dose pouches per minute
• Communications	Ethernet connection to controller
• Internal Temperature/Humidity	Same as pharmacy space
• Internal Cleanliness	HEPA filter, positive pressure, easiest cleaning in the industry
• Peripherals/Workstation	Touch screen monitor, biometric fingerprint reader, integrated barcode scanner integrated RFID readers, keyboard, mouse
• Robotics Motion Controller	Proprietary RxSafe motion control and logic
• Software	Proprietary RxSafe software and firmware

Specifications for RxSafe Controller

• Computer	Industrial quality with 2x500GB hard drives
• Data Security	RAID 1 onboard with full encryption
• Operating System	Microsoft Windows 7
• Database	Microsoft SQL Server
• Power	110 volt A/C, 20 amp
• Uninterruptable Power Supply	1500 VA, 1 hour "power-out" run time for controller

RxSafe Field Performance Data

Cost Reduction

Far less cleaning & maintenance = less down time
Fastest fill rate in the industry
Positive displacement multi-dose pouch filling
Lowest cost consumables in the industry
Automatic, dynamic pouch sizing
Hi-fidelity, direct thermal printing
No print ribbon
All canisters are "smart" RFID canisters
"No exceptions tray"
Utilizes RxSafe patented, universal "smart" canisters
Modular and scalable design preserves initial investment
Smallest footprint

Custom Pharmacy Layout Services

Workflow Optimization — Integrates RxSafe systems' automation into existing pharmacy space
