

RxASP 20™ *Semi-Automated Strip Packaging for any Size Pharmacy or Volume with optional, built-in vision inspection*

Experience the unparalleled, adherence packaging automation technology of the RxASP 20™. No more trays or remote filling stations. No more down time to load trays. Plus, no more errors from hand filling trays—the RxASP 20 can hold up to 20 “smart” RFID canisters, while our universal “smart” canister dispenses virtually all non-loaded oral solid medications such as gel caps, half tabs, etc.

PakCheckRx™, our optional, integrated machine vision inspection means higher accuracy and significantly lower operating cost. Restocking can occur while the machine is operating, so there’s no down time. Even cleaning is far less time consuming. More things get done in less time, greatly enhancing pharmacy efficiency.

The RxASP family of machines has the lowest daily operating costs in the industry—we use automatic, variable pouch length and our consumable pouch material costs are notably the least expensive. Thermal printing means no ink ribbons.

- Most advanced features industrywide, made in the USA
- Unmatched flexibility and security
- Accommodates up to 20 “smart” RFID canisters at a time
- Universal RFID canister—for *all* non-loaded oral solid medications (including gel caps, half tabs, etc.)
- No more trays
- No more remote filling stations
- Optional integrated machine vision for pouch inspection—single workflow step, no secondary machine
- Up to 50 single or multi-med pouches/min.
- Positive displacement pouch filling
- No more expensive consumables
- Less labor
- Smallest footprint
- Less on hand inventory required
- Intelligent software features without extravagant pricing

Specifications for RxASP 20™ System

- Dimensions W=33" L=16" H=68"
- Weight 200 lbs. per RxASP 20
- Capacity Run 20 "smart" RFID canisters simultaneously
- Script Fill Rate Up to 50 multi-med pouches per minute
- Communications Ethernet connection to controller
- Internal Temperature/Humidity Same as pharmacy space
- Internal Cleanliness Easiest cleaning in the industry
- Peripherals/Workstation Packager includes: Built-in controller, power supplies, 20 integrated "smart" RFID canister readers, consumables sensors
Workstation includes: PC, monitor, biometric fingerprint reader, keyboard, mouse, remote "smart" RFID canister reader
- Software Proprietary RxSafe software and firmware

Specifications for RxSafe Controller (built-in)

- Computer Industrial quality with 2x500GB hard drives
- Operating System Microsoft Windows 7
- Database Microsoft SQL Server
- Power 110 volt A/C, 20 amp

RxSafe Field Performance Data

- Cost Reduction
 - Far less cleaning & maintenance = less down time
 - Fastest fill rate in the industry
 - Positive displacement multi-med pouch filling
 - Lowest cost consumables in the industry
 - Automatic, dynamic pouch sizing means one pouch per med pass
 - Hi-fidelity, direct thermal printing
 - No print ribbon
 - All canisters are "smart" RFID canisters
 - "No exceptions tray"
 - Utilizes RxSafe patented, universal "smart" canisters
 - Modular and scalable design preserves initial investment
 - Smallest footprint

Custom Pharmacy Layout Services

- Workflow Optimization Integrates RxSafe systems' automation into existing pharmacy space
