

Fully Automated, Robotic Strip Packaging, Scalable for any Size Pharmacy or Volume

- Most advanced features industrywide, made in the USA
- Unmatched flexibility and security
- Accommodates up to 300 RFID canisters*
- Universal RFID canister—for *all* non-loaded oral solid medications (including gel caps, half tabs, etc.)
- No more trays
- No more remote filling stations
- Optional integrated machine vision for pouch inspection—no secondary machine
- Up to 100 single or multi-dose pouches/min.
- No more expensive consumables
- Less labor
- Smallest footprint
- Less on hand inventory required
- Intelligent software features without extravagant pricing
- Industry standard 1-2% error rate is a thing of the past

Experience the unparalleled, robotic automation technology of the RxASP 300™. No more trays or remote filling stations. No more down time to load trays or cassettes. Plus, no more errors from hand filling trays—the RxASP 300 can hold up to 300 RFID canisters*, while our universal canister dispenses virtually all non-loaded oral solid medications such as gel caps, half tabs, etc. Optional integrated machine vision inspection means higher accuracy and less cost.

Restocking occurs while the machine is fully functioning, so there's no down time. Even cleaning is far less time consuming. More things get done in less time, greatly enhancing pharmacy efficiency.

The RxASP family of machines has the lowest daily operating costs in the industry—we use automatic, variable packet length and our consumable pouch material costs are notably the least expensive.

** More RFID canisters can be stored nearby to be swapped in and out. RxSafe does not recommend the purchase of "spare" packaging units—further space and cost savings.*

Specifications for RxASP 300™ System

- Dimensions W=52" L=61" H=95"
- Weight 500 lbs. per RxASP 300™ tower
- Capacity Up to 300 RFID canisters
- Script Fill Rate Up to 100 pouches per minute
- Communications Ethernet connection to controller
- Internal Temperature/Humidity Same as pharmacy space
- Internal Cleanliness HEPA filter, positive pressure
- Peripherals/Workstation Touch screen monitor, biometric fingerprint reader, integrated barcode scanner integrated RFID readers, keyboard, mouse
- Robotics Motion Controller Proprietary RxSafe motion control and logic
- Software Proprietary RxSafe software and firmware

Specifications for RxSafe Controller

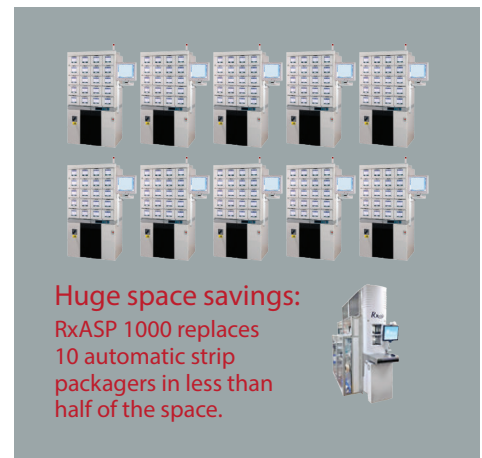

- Computer Industrial quality with 2x500GB hard drives
- Data Security RAID 1 onboard with full encryption
- Operating System Microsoft Windows 7
- Database Microsoft SQL Server
- Power 110 volt A/C, 20 amp
- Uninterruptable Power Supply 1500 VA, 1 hour "power-out" run time for controller

RxSafe Field Performance Data

- Cost Reduction**
- Far less cleaning & maintenance = less down time
 - 50% less pharmacy floor space required
 - 60% less on-hand inventory
 - 50% fewer FTE hours
 - Avoids waste due to expired drugs
 - Secure narcotics cassettes
 - Industry-leading accuracy
 - All drugs securely stored—no theft, loss or diversion

Custom Pharmacy Layout Services

- Workflow Optimization**
- Integrates RxSafe systems' automation into existing pharmacy space
