VisionRx™

Next Generation Pill Counting • Built-in Digitized/Remote Final Check

Verify Every Pill Safely & Securely From Anywhere*

Networked for Success

Patient Safety Optimized	PV2 Remote Final Check	Inventory Management	PMS Integration	Secure Connectivity

Features

- Counts & verifies all oral solid medication including clear gel caps.

- For each vial-filled script or pre-pack, captures clear, accurate images of every pill on the counting tray, label on the vial, and pills in the vial. **All with pill verification.**

- Pill properties are combined with patient information, lot number and expiration date and recorded in the database along with date, time and biometric operator identity.

- Data is transferred over a secure network to other pharmacists, enabling them to perform digitized remote final check functions, in pharmacy or remotely.

- Upon pharmacist approval, the prescription is released from will-call by the clerk to the patient.

- Built-in pill verification alerts the fill tech of an error requiring correction before the script can be filled and is presented to the pharmacist for final check function.

- Added security for tech check tech.

*With Secure Network
