Retail Adherence Pouches
for RapidPakRx

	Description	Cost
2.5 inch Thermal Paper	1740 ft. (2 rolls)	\$155.92
2.9 inch Cellophane	1740 ft. (1 roll)	\$101.06
Total Combined Cost		\$256.98 for 1740 ft.

1740 ft. = 20,880 inches

Average Cost per Inch: $\$256.98 \div 20,880 \text{ inches} = \0.01230 per inch

Average Pouch Length*: 1.75 inches

Average Cost per Pouch*:

$\$0.01230 \text{ per inch} \times 1.75 \text{ inches} = \$0.02152 \text{ or } \mathbf{2.15 \text{ cents per pouch}}$

No extra cost for ink since the paper is thermally printed!

RapidPakRx™ is the only strip packager technology with automatic, variable pouch length.

** Real-world length average is determined by a combination of the minimum print space required based on data elements needed on the pouch, and the average volume of oral solids per pouch.*
